-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Election/Restrictions***

1. Claim 1 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 06/13/2005.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Langois (4,125,582).

4. Langois teaches a method of making marbled parts using a melt stream of multiple colors of thermoplastic materials. The apparatus comprises the claimed screw component.

5.

Art Unit: 1773

6. The essential difference between the claimed process and the process taught by the prior art is the addition of a colored transparent layer over the molded structure to control the color of the article. It is common to coat plastic structures with a transparent color layer in order to change the color of the object. This is often done for structure in which one wants aspects of the surface to show through. (e.g. a metallized structure).

7. It would have been obvious to one having ordinary skill in the art to have coated the articles taught by Langois with a transparent color layer depending on the color of the object desired. The color provides no function other than esthetics and such a change would have been obvious to one having ordinary skill in the art at the time the invention was made since changes in color are well within the ordinary skill of the art and merely a design choice.

8. Regarding claims 2-6, it would have been obvious to one having ordinary skill in the art to have varied the processing conditions and choices of the plastic materials depending on what appearance was desired.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Lawrence Tarazano whose telephone number is (571)-272-1515. The examiner can normally be reached on 8:30 to 6:00 (off every other Friday).
